SIX SENSES QING CHENG MOUNTAIN

Six Senses serves as a change maker and maintains a leadership commitment to community, sustainability, emotional hospitality, wellness, and crafted experiences, infused with a touch of quirkiness. Whether an exquisite island resort, mountain retreat, or urban hotel, the vision remains the same: to reawaken people's senses, so they feel the purpose behind their travels and ultimately reconnect with themselves, others, and the world around them.

Located at the picturesque gateway to the majestic Qing Cheng Mountains, Six Senses Qing Cheng Mountain has been created to complement the UNESCO World Heritage & Natural Cultural site nearby Dujiangyan. Drawing upon the renowned Six Senses perspective of responsible luxury, the resort has been brilliantly designed to incorporate regional architecture and landscaping, resulting in an extraordinary cultural offering with a strong sense of place wedded to contemporary attitude.

Six Senses logo has derived from the fingerprints of monks praying for blessings. Logo represents six spheres or motifs that are aligned based on the senses. SEE, SOUND AND SMELL, TOUCH and TASTE; The final motif called the “apex” represents the sense of “Balance” or harmony which comes when we connect with all of our senses

SUSTAINABILITY

FINDINGS

Six Senses commitment to using responsible ingredients and produce, from the local community and their own farm, is observed at Six Senses Qing Cheng Mountain. The on-site organic garden is centrally located as a feature of the resort and chefs harvest as required. For those items not grown at the resort, local farmers are tasked with producing to the chef's specifications.

FINDINGS

We committed to sustainable development project management in the fields of electricity, water, waste volume, waste treatment .The resort produces, purifies and packages drinking water, which can reduce the use of 120,000 plastic bottles every year. We use furniture and degradable guest supplies to be environment friendly. We have set up a “zero waste” project for wasting water recycling irrigation and kitchen waste composting. All vehicles in the hotel are powered by electricity to provide bicycle rental service for guests and all light bulbs in the hotel are more energy-saving LED bulbs, reducing the use of energy. We establish a special fund focusing on the local community and make cooperation with Love House, a local animal rescue organization in Chengdu, to show our CSR.

FINDINGS

Sustainability is Primary at Qing Cheng Mountain.

Stay with Six Senses Hotels & Resorts means that you're already contributing to sustainability funds that benefit local communities and environments. Our partnership with NGOs and projects on the ground are made possible by your ongoing engagement in our various experiences. Chengdu Caring House Animal Shelter was established in 1996 by Auntie Chen, who is now 74 years old. She devoted all she had to save as many strays as possible, and the center currently shelters around 6,000 animals. We regularly take part in volunteer activities and donate supplies to the center, so as to reinforce the effort to rescue stray dogs and cats. We continue to share and pass on the concept of sustainable development to the surrounding communities, open sustainable development knowledge classes with schools, and organize our hosts to provide caring services for the surrounding welfare institutions.

FINDINGS

Six Senses Qing Cheng Mountain shares its "Eat with Six Senses " philosophy, which is centered around nature, incorporating " Natural ingredients ", " Local & Sustainable " and " Less is more" into the dining experience, restoring the true flavors of food and helping guests reconnect with their food. This coincides with the traditional Chinese dietary philosophy of "eating according to the time".

FINDINGS

We combine “Grow With Six Senses” project with sustainability project, through a series of manual and interactive activities such as making teddy bear dolls with waste towels, recycling water bottle paintings, old uniform cloth brushes, etc. So that we can let the children realize the fun of turning waste into treasure and the importance of protecting the environment.

Intangible Cultural Heritage Inheritor are invited to share the historical stories behind the crafts and pass on the non-heritage culture. We regularly hold happy farm activities to let children embrace nature. Meanwhile, the children's activities and amusement facilities in the hotel are designed and built by our hosts in the hotel engineering department according to local conditions and materials.

FINDINGS

Ben Pu

Ben Pu is created by Six Senses Qing Cheng Mountain and Ben Pu academy, which excavates and restores the excellent products with spiritual essence, cultural core and life foundation in traditional Chinese life. It is involved in traditional industries such as clothing, food, tea, fragrance, wares, traditional medicine, art and books.
